Professional Background:
- 7+ years' experience in software development.
- Currently working on PIM solutions in Product Domain.
- 6+ years of working experience on Master Data Management Solutions in Retail, Product and Manufacturing domain.
- PIM Professional (IBM PIM and Informatica PIM) with strong understanding of Products, Retail and Manufacturing domain.
- Worked actively on RFP's for determining best PIM solution using Informatica PIM /IBM PIM for upcoming engagements
- Worked actively on Informatica PIM Repository configuration, Data Model creation and modification, Structure Groups, Import mapping for delta and bulk data, Exports for downstream channels, plugin creation.
- Currently working with **XYZ.**

Technical Background:

Languages/ Technology	Informatica PIM (Heiler PIM)
	IBM PIM Scripting
	IBM PIM using PIM JAVA API
	PL/ Sql
Tools/ Framework	Informatica Product Manager (Heiler) v 8/7.1/7
	IBM InfoSphere MDM server for PIM WPC v 10 / 9.x /6.X
	Microsoft Sql Server (2008 R2/ 2012)
Databases	SQL Server 2008R2/ 2012

Project detail:-

Start Date	09.05.2016	Project Role(s)	Technology Analyst
End Date	#	Team Size	15
Domain	Retail	Company Name	XYZ

Skills	Duration (In Months)
Informatica Product 360(Informatica PIM)	012
Informatica data Quality (IDQ)	006
Putty	007

Description: XYZ is leading wine and spirits distributor cross US. SGWS decided to maintain items and supplier's information in PIM. As part of the implementation the first phase of the Master Data Management (MDM) program will focus on implementing the appropriate technology and workflow automation to support a new Item Master Hub and enhance the new item induction process.

	These tools will aid in maturing the MDM discipline at Southern Glazer's Wine & Spirits and ensure consistency and control in the ongoing use of MDM information. To that end, the project will include the implementation of new technology to support a hierarchical new item master and replace the National Item Registry (NIR) system with Informatica Product 360.
Responsibilities:	• I have helped in Requirement gathering and prepared Design document. • Worked on adding new fields in repository, any repository change/updates and management • I have created the PIM DQ rules in IDQ (Informatica Data Quality) and executed successfully in PIM. • Worked on Web UI and created the desired Design Page as required.
Other Tool(s):	• Build the PIM import mapping, export templates, Merge, and workflows
O. S.:	• Worked on Rich client as well as PIM web. • Worked on Supplier Portal and managing the supplier user. • Written complex functions for import
	Talend (Used For Data Profiling)
	Windows

Project Details:-

XYZ			
Start Date	29.11.2012	**Project Role**	Developer
End Date	#	**Team Size**	20
Domain	Banking	**Company Name**	XYZ

Skills	Duration (In Months)
IBM MDM Collaboration Server V10.1 [WPC]	**028**
Informatica Product 360(Informatica PIM)	**012**
Core Java	**005**
Shell Scripting	**003**

Description:	Scope of this project is to provide the Product Information Management (PIM) solution for managing

	product information. To provide a centralized repository with processes to support the management and standardization of product information. Mastering the reference data of the bank and syndicating to multiple channels for their consumption at the end of day. There are several business units in the bank which requires PIM solutions that centralize and optimize the product data. Existing application is not providing enough flexibility to the business users and is not giving a single view of product data. Each unit is coming as 1 project with own set of requirements.
Responsibilities:	• Involved right from the discovery phase of the project. Involved in Infrastructure building of the project, Coding, Develop and do Unit Testing. • Fix the bug if any reported and deploy them in ST, SIT. • I have Build myself expertise in Java API, Script API of Collaboration Server and also in the usage of RSA with IBM CS Workbench and ClearCase. • I am proficient in usage of ClearCase as the configuration management tool. • Used Clear Quest and Quality Centre,HP Service Management 7 as per Project Requirement. • Prepared understanding document explaining few functionality of Collaboration Server which is shared among the team.
Other Tool(s): **O. S.:**	• Prepared, Reviewed and amended Test Plan and Done the UTP, UTR for the project. Prepared the SOE (Sequence of execution) document for pre production and for implementation in production Rational Software Architect V8, ClearCase Explorer V7, HP Service Management 7, Quality Center, Rapid Deploy V3, Connect:Direct, Unix AIX V7 and Windows

Skills	Duration (In Months)
JSF - JavaServer Faces	008
Core Java,Java J2EE,Java Script	007
JDeveloper	007
EJB - Enterprise Java Beans	003

Description:	Q Project is an online self help (self care) tool for the customers who has already subscribed to the XYZ and internal users of XYZ. This application allows different type of users like shipper, Network operator, DMSP. Using this application user can log, Resolve and close contact of MPRN. Where the External can raise the queries of MPRN, Data clarification, Configuration Management and Site Visit through this application. This project based on JSF application in Oracle JDeveloper 11g Framework using SOA server for web services.
Responsibilities:	• Q Project based on JSF application with weblogic server in Oracle JDeveloper 11g framework .Worked on JSF in JDeveloper IDE . • Worked on the static web page design part of project and learnt Cascading Style sheets (CSS) for re-skinning of static web pages. • Worked on the coding part when there is issues like (JavaScript validation, show popup, any code changing and others). • For time being I also worked in security like User Provisioning,Organisation Management(Assigning Permitted Resource, Creating Administrative Group,Providing Organisational Unit). • Used Clear Case for version control as per the project requirement. • Fix the bug if any reported.
Other Tool(s):	
O. S.:	
	ClearCase Explorer V7,WinMerge
	Windows
